Safe City Strategy

View at: <http://www.logan.qld.gov.au/lcc/residents/communitysafety/citysafe.htm>

5. Written - Profile of the City (baseline data)

Logan is located in the heart of south-east Queensland Australia, midway between Brisbane and the Gold Coast. With a population of around 175,000 (2007) Logan is Queensland's third largest city. The city enjoys the best of all worlds. Its access to the State's major transport links makes it an ideal residential and business locale, but without the congestion or expense of living in a capital city or a major tourist town.

Logan celebrates our diversity, with over 160 different cultures, and the rich and varied lifestyle it offers. Logan is also a very young city with more than 50 per cent of residents aged 30 or younger. This adds energy and enthusiasm to our community and gives us a real vibrancy. Logan has become known as one of the most diverse cities in Australia.

South-east Queensland has one of the most enviable climates in the world with warm, sub-tropical summers (21 - 37 degrees Celsius), and mild, sunny winters (8-20 degrees Celsius). There are 350 days per year where the temperature at 3pm in Logan is between 15 and 27 degrees Celsius. Annual rainfall is around 150mm per month between December and March, and 50mm per month from June to December.

Logan City Council Demographic Profile
